

Daily TMR Manager

DESCRIPTION

The **DTM Suite** is a professional feeding management software that drives your precision feeding system. The comprehensive program helps farmers monitor and control feed costs, inventory, ration adjustments and other on-farm processes to increase profitability of the farm.

BENEFITS

CLOUD BASED SOFTWARE

- Data available where you need it, when you need it.
- No hardware, no administration, low implementation costs.

PREMISE BASED, LOCAL INSTALLATION

- A locally installed solution can be provided to ensure maximum reliability in locations where the internet can be unreliable

TRAINING & SUPPORT

- Managed training services from experienced team delivers rapid deployment.
- 24/7 Remote support options available.
- Dedicated support services for all DTM customers.

YOUR OWN TAILORED TOOL

- We can tailor the DTM to match your businesses requirements (i.e. interface with main herd management software to import milk data, online access for your trusted nutritionist to specific reports etc.)
